

EXPERIENCE

Infosys

System Engineer(Mar-2025—Present)

(.Net Devloper)

- Built and enhanced backend services using C# and ASP.NET, supporting API-driven modules.
- Fixed production bugs and implemented new features without affecting existing functionality.
- Performed debugging and root cause analysis to resolve production issues.
- Implemented business logic and validations within service layers.
- Collaborated with team members and followed JIRA-based workflows to deliver fixes within SLA timelines.
- Debugged and identified Angular-related issues in existing UI components and API integrations, collaborating with frontend developers to ensure proper fixes.

System Engineer Trainee(Oct-2024— Feb-2025)

- Developed RESTful APIs using ASP.NET Core Web API with Entity Framework Core and MySQL for backend data management.
- Implemented CRUD operations and followed REST principles for efficient client-server communication.
- Integrated Swagger for API documentation and endpoint validation.
- Tested and verified APIs using Postman to ensure correctness and reliability.
- Built a responsive frontend using Angular and TypeScript, applying component-based architecture.
- Consumed backend APIs in Angular using HTTP services for dynamic data rendering.

EDUCATION

K.L.E. Institute Of Technology

Bachelor of Engineering (B.E.)

CGPA - 7.92 | Grad.2022

B V V S Collage Bagalkoat

Score - 71% | Grad. 2019

S R C P U Collage Hoskoti

High School

Score - 87% | Grad. 2016

KEY PROJECTS

BookNest-[Github](#) | [Liveliink](#)

- Designed and developed a secure book management web application using C# and ASP.NET.
- Implemented user authentication and authorization to control access based on roles and permissions.
- Managed user sessions to maintain login state and ensure secure navigation across the application.
- Developed CRUD operations for book management using Entity Framework Core
- Built backend APIs and business logic following RESTful principles.

LearnMore – [Github](#) | [LiveLink](#)

Tech stack-Angular, ASP .Net Core, EF Core ,SQL

- Designed and developed a full-stack e-learning platform using ASP.NET Core Web API and Angular following a layered architecture.
- Built role-based authentication and authorization for Admin and User using secure login mechanisms.
- Developed an Admin Dashboard to manage users, courses, enrollments, and feedback.
- Enabled admins to view registered users, enrollment counts, add/remove users, and monitor user feedback.
- Added input validation and error handling to ensure data integrity and application reliability

TECHNICAL SKILLS

- Backend: C#, Java, ASP.NET , ASP.NET Core Web API
- Frontend: Angular, TypeScript, HTML, CSS,
- Database: SQL Server, MySQL
- ORM / Data Access: Entity Framework Core, ADO.NET
- Tools :Github, Visual Studio, Postman, Swagger, JIRA,Tortoise SVN, Nitro Pro, VS Code,SSMS

COURSEWORK

- .NET Full Stack Development
- Data Structures and Algorithms
- **Computer Science Core:**
 - Operating System
 - Database Management System
