PROFESSIONAL SUMMARY

Software Engineer with 2 year of experience at Infosys designing and developing RESTful APIs using C#, ASP.NET Core, and SQL databases. Strong foundation in data structures, algorithmic problem solving, and full-stack development with Angular. Passionate about building scalable, high-performance backend systems.

EXPERIENCE

Infosys — System Engineer (.NET Backend Developer)

October 2024 – Present

- Built and enhanced backend services using C# and ASP.NET Core, improving API response efficiency by ~25% for key application modules.
- Developed RESTful APIs using ASP.NET Core Web API with Entity Framework Core for efficient backend data management, implementing CRUD operations following REST principles.
- Integrated Swagger for API documentation and endpoint validation, improving developer productivity and API usability.
- Built responsive Angular components using TypeScript with component-based architecture and REST API integration via Angular HTTP services.
- Performed root cause analysis to identify and resolve production issues, reducing recurring incidents and maintaining application stability.
- Implemented business logic and validations within service layers to ensure data consistency and reliable application behavior.
- Collaborated with cross-functional teams using JIRA-based workflows, ensuring timely delivery within SLA timelines.

KEY PROJECTS

LearnMore — C#, ASP.NET Core, EF Core, MySQL, Angular | [GitHub](#)

- Built a full-stack e-learning platform using ASP.NET Core Web API and Angular following layered architecture.
- Implemented role-based authentication for Admin and User roles, with admin dashboard for user management, enrollment tracking, and feedback monitoring with authentication and authorization.

BookNest — C#, ASP.NET, EF Core, MySQL | [GitHub](#)

- Designed and developed a secure book management web application with role-based user authentication and authorization.
- Built backend APIs following RESTful principles with managed user sessions for secure navigation.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core Web API, Entity Framework Core, Java

Frontend: Angular, TypeScript

Database: SQL Server, MySQL

Tools & Practices: Visual Studio, VS Code, Postman, SSMS, GitHub, JIRA, Agile, Swagger

EDUCATION

B.E. (Bachelor of Engineering) — K.L.E. Institute of Technology - CGPA: 7.92

Diploma — BVVS Bagalkot -: 71%

High School — S.R.C.P.U. College, Hoskoti — 86%
